

Map the Journey to the Tap

Ages 7+, with adult help

Name: _____ Date: _____

Use adult-verified information. Label the source, confirmed components, and tap. Put a question mark beside unknown parts.

A diagram is a model. Homes have different systems. Drawing a filter does not establish that the water is safe.

Source of our water:

Components an adult has confirmed, in order:

One component and its job:

A question to ask an adult or qualified professional:

Observation only. Do not open equipment, adjust controls, handle chemicals, or loosen fittings. EPA: [epa.gov/privatewells](https://www.epa.gov/privatewells)

Workspace & adult notes

Answer check / discussion

1. Answers depend on the verified household system.
2. Do not assume a well, treatment system, or component order.
3. Examples: a pipe carries water; a gauge shows a measurement.
4. Use local health guidance for water quality and qualified help for maintenance.

What was clear? What would we change next time?
